In view of applicants' response filed on 10/23/08 the following still applies.

Claims 17 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. Reason #2 of the previous action remains. Clarification of R and Q is needed. Also claim 20 has been amended to recite "n" which does not appear in claim 17. Perhaps "m" was intended.

Claims 1, 9, 13, 15, 17, 20 and 28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Scope of all solvates (including hydrates) remains nonenabled for reasons given previously. While it may be routine to make solvates by exposing compounds to a variety of solvents, this does not mean it is routine for any given compound to form solvates- a fact clearly stated by Vippagunta. As was stated in *Morton International Inc v. Cardinal Chemical Co.* 28 USPQ2d 1190 at p.1194 : "The specification purports to teach with over fifty examples, the preparation of the claimed compounds with the required connectivity. However... there is no evidence that such compounds exist... the examples of the '881 patent do not produce the postulated compounds..there is... no evidence that such compounds even exist." . The same applies in the present case.

Claims 1,9,15,17 and 20 remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. While applicants have amended the scope at Ar and Cys, the scope of hetero rings permitted at Q is still enormous compared to what has been made and tested.

Claims 13, 15 and 28 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim because claims cannot depend on different sets of claims to different features. See MPEP § 608.01(n).

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
